### SURGERY TECHNIQUES IN LARYNGOLOGY

#### HANDS-ON WORKSHOP

**Friday, March 4, 2022**

8:00 – 18:30  
and

**Saturday, March 5, 2022**

8:30 – 18:00

WWW.MEVOC.DE

#### INTRODUCTION

Dear colleagues,

Skill acquisition for enhanced surgical techniques in laryngology requires very specialized knowledge as well as practical training. Expertise in both can be transferred when highly experienced tutors show and share what they know and how their decision making process works with normal and with complicated cases.

With our new combined workshop on phonemic-surgery, office-based interventions and laryngeal framework surgery we selected 'hot topics' and basic routine surgery techniques – all to be trained and refined at our course. Lectures are given by clinical experts, complemented by live surgery, hands-on cadaver larynx dissections as well as laboratory hands-on training for skills needed for office-based interventions and fiber-guided laser surgery. All participants will have the opportunity to practise several techniques during the 'hands-on' parts.

Our international faculty comprises a team of highly specialized ENT surgeons and phoniatricians who focus their daily work on laryngology and voice. We are looking forward to your attendance in Hamburg.

Markus M. Hess, MD

#### PROGRAM

##### Day 1: Friday, March 4, 2022

8:00	Registration & Welcome
8:30	Transnasal interventions: prerequisites and anesthesia
9:00	Injections and biopsies
9:30	Office laser surgery
10:00	– Coffee break –
10:30	Office based live surgery
12:30	– Lunch break –
13:00	Medialization thyroplasty: Indications and techniques
13:30	Designs of implants: pros an cons
14:00	Augmentation, Liposuction
14:30	Revision surgery, pitfalls and complications
15:00	– Coffee break –
15:30-18:30	Hands-on training with fresh cadavers: Framework Surgery, augmentation, injection, anatomic dissection of human larynges. Location: Department of Legal Medicine
19:30	Get-together at Poletto's Winebar

## PROGRAM

-

### Day 2: Saturday, March 5, 2022

8:30	Lasers in laryngology
9:00	Anterior commissure cancers: Endoscopic or open larynx approach?
9:30	Dysplasia: CO2 resection or photoangiolytic?
10:00	- Coffee break -
10:30	Sulcus vocalis: diagnostics and treatment
11:00	Cysts and scars
11:30	Synechia: keel or mitomycin?
12:00	Recurrent respiratory papillomatosis
13:00	- Lunch break -
13:30	Laser tissue effects
14:00	Hands-on training: Laser and other interventions
15:30	- Coffee break -
16:00	Hands-on training: Laser and other interventions
17:30	General discussion, evaluation, certificates, closing remarks
18:00	Adjourn

## GENERAL INFORMATION

-

### Target Group:

ENT surgeons, laryngologists who want to expand their phonosurgical skills

### Content:

Lectures, demonstration, live-surgery, hands-on sessions, surgical simulation lab with human cadavers

### Workshop Fee:

Registration fee: 1.500 €  
ELS members: 10% discount

### Covid-Policy:

All participants will be required to be fully vaccinated.

### Registration:

Please contact  
Susanne Fleischer, MD  
E-Mail: [contact@mevoc.de](mailto:contact@mevoc.de)

**Limited number of participants.**

## FACULTY

-

### Ahmed Geneid, MD, PhD

adj. Professor Laryngologist and Phoniatician  
Head of the Phoniatics Department  
Helsinki University Central Hospital, Finland

### Elisabeth Sjögren, MD, PhD

Professor  
Dept of Otolaryngology – Head & Neck Surgery  
Leiden University Medical Centre, The Netherlands

### Hans Mahieu, MD, PhD

Professor emeritus  
Dept of Otolaryngology – Head & Neck Surgery  
Amersfort Medical Centre, The Netherlands

### Markus M. Hess, MD, PhD

Professor  
MEDICAL VOICE CENTER, Hamburg, Germany

-

### Location:

MEDICAL VOICE CENTER  
Martinistr. 64  
20251 Hamburg
