SURGERY TECHNIQUES IN LARYNGOLOGY

HANDS-ON WORKSHOP

Friday, November 21, 2025

8:00 – 18:30

and

Saturday, November 22, 2025

8:00 – 18:00

WWW.MEVOC.DE

INTRODUCTION

Dear colleagues,

Skill acquisition for enhanced surgical techniques in laryngology requires very specialized knowledge as well as practical training. Expertise in both can be transferred when highly experienced tutors show and share what they know and how their decision making process works with normal and with complicated cases.

With our new combined workshop on phonemic-surgery, office-based interventions and laryngeal framework surgery we selected ‘hot topics’ and basic routine surgery techniques – all to be trained and refined at our course. Lectures are given by clinical experts, complemented by live surgery, hands-on cadaver larynx dissections as well as laboratory hands-on training for skills needed for office-based interventions and fiber-guided laser surgery. All participants will have the opportunity to practise several techniques during the ‘hands-on’ parts.

Our international faculty comprises a team of highly specialized ENT surgeons and phoniatrists who focus their daily work on laryngology and voice. We are looking forward to your attendance in Hamburg.

Markus M. Hess, MD, PhD

Sponsored by:

FACULTY

Ahmed Geneid, MD, PhD

adj. Professor Laryngologist and Phoniatician
Head of the Phoniatrics Department
Helsinki University Central Hospital, Finland

Elisabeth Sjögren, MD, PhD

Professor
Dept of Otolaryngology – Head & Neck Surgery
Leiden University Medical Centre, The Netherlands

Karen Marie Kost, MD, PhD

Professor
McGill University Health Centre, Montreal, Canada

Markus M. Hess, MD, PhD

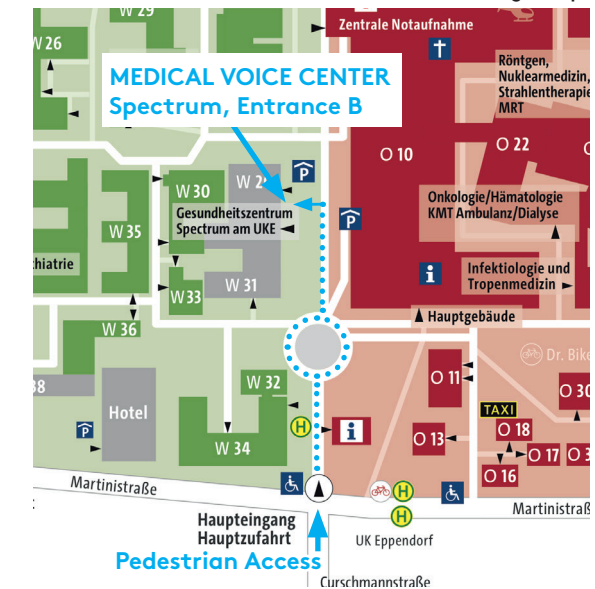

Professor
MEDICAL VOICE CENTER, Hamburg, Germany

GENERAL INFORMATION

-

Target Group:

ENT surgeons, laryngologists who want to expand their phonosurgical skills

Content:

Lectures, live-surgery, hands-on sessions, human cadaver dissections, thyroplasty and augmentation training with laryngeal cadavers

Workshop Fee:

1.750 €

Registration:

Please contact
Bettina Hess, PhD
E-Mail: contact@mevoc.de

Limited number of participants.

PROGRAM

-

Day 1: Friday, Nov. 21, 2025

8:00	Registration and Welcome
8:30	Office-based interventions: prerequisites and anesthesia
9:00	Office-based injections and biopsies
9:30	Office-based transnasal surgery
10:30	- Coffee break -
11:00	Office-based live surgery
12:00	- Lunch break -
12:30	Framework surgery Type I-IV: Indications and techniques
13:00	Medialization thyroplasty: My experience
13:15	Designs of implants: pros and cons
13:30	Montgomery and VOIS implants
13:45	Arytenoid adduction
14:00	Panel: Medialisation thyroplasty
14:30	Augmentation: Techniques, pearls and pitfalls
15:00	- Coffee break -
15:30	Hands-on training with fresh cadavers: Framework surgery, augmentation, injection, anatomic dissection
18:30	Adjourn
19:00	Get together at Poletto's Winebar

PROGRAM

-

Day 2: Saturday, Nov. 22, 2025

8:00	Lasers in laryngology
8:30	CO2-Laser: Do's and don'ts
9:00	Dysplasia: CO2 resection or photoangiolyysis?
9:15	Anterior commissure cancers: Endoscopic or open approach?
9:45	Synechia: keel or mitomycin?
10:00	Sulcus vocalis and scars: Diagnostics and treatment
10:30	- Coffee break -
11:00	Recurrent respiratory papilloma
11:30	Panel: Phonomicrosurgery of benign mass lesions
12:30	- Lunch break -
13:00	Hands-on training: Laser and other interventions
15:00	- Coffee break -
15:30	Hands-on training: Laser and other interventions
17:30	General discussion, evaluation, certificates, closing remarks
18:00	Adjourn
